Joaquin Sablan  
President  
Northern Marianas College  
Saipan, MP 96950

Dear Mr. President,

Re: Pacific Rim Academy - Program Update

I am writing to extend my gratitude to the Administration and Board of Regents of the Northern Marianas College for their continued support of the programs and plans of Pacific Rim Academy. This letter serves as an update to our progress. We would also like to take this opportunity to seek your direction on a couple of issues that are concerning to us.

To date the Pacific Rim Academy, in cooperation with the Northern Marianas College, has successfully attracted numerous local students to its program. While more than 20 students have been offered acceptance letters to Pacific Rim Academy, we have been informed that all of the local participants are relying on funding from the Scholarship Office in order to facilitate their payment of tuition and fees. We further understand that, as of this date, the Scholarship Office have not made a commitment of scholarship funding to students aiming to enroll in the NMC/Pacific Rim Academy program. Our original plan was to open the program to students on August 21, 2000, in conjunction with the start date of the first semester for the NMC 2000-2001 school year. At this point in time we are not certain that interested students will have the

PLAINTIFF'S  
EXHIBIT

28

financial resources available to them by this date. As a result we would like to propose the following two contingency plans:

- (1) In the event the Scholarship Office will commit scholarship funds to Pacific Rim Academy students on or before Friday, August 11, 2000, we respectfully request an extension of our program start date to early September, tentatively Tuesday, September 5, 2000.
- (2) In the event the Scholarship Office decide they will not commit scholarship funds to Pacific Rim Academy students, we respectfully request an extension of our program start date to mid-January 2001, the start of the second semester of NMC's 2000-2001 school year. During the period of August -November 2000, executives of the Pacific Rim Academy will be travelling to the Philippines, Singapore and Hong Kong in an effort to recruit foreign students for enrollment in NMC/Pacific Rim Academy. The additional 16 weeks should also provide adequate time for local students to organize their own funding for tuition and fees, should they continue to be interested in the program, notwithstanding a lack of support from the Scholarship Office.

We look forward to your guidance and approval on these the contingency plans that we have proposed.

Regards,

  
Leonard Wolf  
President  
Pacific Rim Academy

## Vocational Education Department

**NORTHERN MARIANAS COLLEGE  
COMMONWEALTH OF THE NORTHERN MARIANA ISL**

Vocational Education Department

**Special Projects:** The NMC Vocational Department is involved in several on-campus and off-campus special projects, including instructional classes at the Department of Corrections and the Youth Services Adult High School, and an advanced Audio Visual Film & TV Production & Post Production Program.

**ASSOCIATE IN APPLIED SCIENCE: CONSTRUCTION TRADES** - In this degree program, the basics of carpentry, masonry, plumbing, refrigeration, and electricity are presented in conjunction with practical laboratory and real-world experiences with emphasis on standard as well as local building codes. Laboratory and real-world experiences reinforce materials covered in the classroom and also provide practical knowledge on how to renovate the home or make routine everyday repairs to the home. The inclusion of local building codes provides students with the latest information on local laws as they apply within the CNMI.

**CERTIFICATE OF ACHIEVEMENT IN CONSTRUCTION TRADES** - In this certificate program, the primary topics of carpentry, masonry, plumbing, and electricity are presented in conjunction with practical laboratory and real-world experiences, with emphasis on standard and local building codes.

**ASSOCIATE IN APPLIED SCIENCE: ELECTRICAL INSTALLATION AND MAINTENANCE** - Theory and practical experience with emphasis on the National Electrical Code provide the focus of this degree program. Students gain practical experience in solving electrical problems such as replacing the heating elements of hot water heaters, installing electrical wiring in home renovations, and installing or replacing electrical fixtures of all kinds. Knowledge of the National Electrical Code gained in this program gives students the technical advantage needed for employment or advancement in critical jobs such as Electrical Inspector or Electrical Foreman. The program emphasizes wiring installation and maintenance.

**ASSOCIATE IN APPLIED SCIENCE: ELECTRONICS** - Maintenance of high-tech equipment requires well-trained technicians, and this degree program provides the foundation needed to get started in this challenging field. The theoretical and mathematical emphasis of the curriculum is supported by practical experiences such as bread-boarding, and use of the latest test equipment gives students the technical advantage needed in today's electronics industry.

**ASSOCIATE IN APPLIED SCIENCE: REFRIGERATION & AIR CONDITIONING** - The primary objective of this degree program is to help individuals acquire the knowledge and experience needed to make routine repairs to air conditioners and refrigerators, to enter the technical field of Refrigeration and Air Conditioning, or to achieve the technical expertise necessary to start their own business in this area. In addition to theoretical principles, emphasis is placed on practical laboratory experience such as adding freon to air conditioners and changing thermostats.

Mr. Leonard (Butch) Wolf  
President  
Pacific Rim Academy  
PMB A-42 P.O. Box 10001  
Saipan, MP 96950

Dear Mr. Wolf:

In a recent meeting with the Northern Marianas College President and Director of Technical Trades/Special Projects, the following matters were discussed:

1. Two A/V courses by the Pacific Rim Academy are to be included in the Spring 2001 semester class schedule.
2. The tuition charged for the A/V courses will be the same as the other courses offered by NMC. However, a lab fee of \$870 will be charged for each course and listed in the Spring 2001 class schedule. The lab fee will be used to cover Pacific Rim Academy expenses and will be placed in a special account under the NMC Continuing Education unit. The lab fees are to be transferred to Pacific Rim Academy within fifteen (15) business days upon receipt by the Business Office.

We look forward to having these courses offered soon. Please do not hesitate to contact the Director of Technical Trades/Special Projects or myself if you have any questions regarding these or any other matters.

Sincerely,

  
Edward C. Camacho  
Dean, Continuing Education

**To:** Jack Angello  
**Subject:** RE: New Courses

Dear Jack,

At the moment, I have no tactical plan of any type in the works. For nearly six years now, I've been developing and teaching new courses that have never made it through the AC, and I'm still teaching them, so it doesn't seem like it's worth expending much energy on getting them through the AC. The same thing can be said about the new programs. I got them approved in concept by the BOR, and whether or not the AC ever moves on them is not of any concern to me at this point, since they are now being offered. I know this sounds like a cop-out, but a long time ago I found out that some boulders were simply too big for me to move. Remember the story about the little boy asking the priest, "Can God do anything?" The priest, of course, said "Most certainly my son. Nothing is impossible with God." The boy then asked, "Then can He make a stone so big he can't move it?" To my knowledge, the priest is still trying to answer that question. Well, the AC is my stone, and I've figured out it's simply too big to move, so I'm going to leave it where it is.

Dear Fred--

Following our last conversation in the matter of new NMC courses and their delay and/or lack of Academic Council approvals, please advise me on your tactics to finally get Academic Council approval (or the alternative) on the computer courses you have delivered over the past 3-4 semesters. Thanks.

Jack

Subject : Omission of Course  
CC : Ms. Kimberly King, BOR Tinian  
: Ed Camacho, Dean  
: Director, Vocational Education

Dear Sir:

After reviewing documentation for setting up Vocational Education programs ( Technical Trades ) at NMC-Tinian, it came to my attention during registration that Construction Trades I was not included on the Master Schedule.

This was a course offering that was previously planned and anticipated, since Ms. Kimberly King, Tinian BOR had strongly emphasized to me that she would like to have Vocational Trades offered here as an option for our present and future students.

Please review the attachments and advise.

## CONTINUING EDUCATION

JANUARY 22, 2001

TO: DEAN OF CONTINUING EDUCATION  
FROM: DIRECTOR OF VOCATIONAL/TECHNICAL ED  
SUBJ: REMOVAL OF PRA PROPERTY

As per your instructions to advise you of the recent incident involving PRA property, please be advised when I entered the "V" Building on Saturday (1/20/01) I noticed that all the Pacific Rim Academy (PRA) posters and signs had been stripped from the walls and doors. Due to the fact that there has been no final resolution, nor official notice of continuation or cancellation of the NMC/PRA lease agreement and program implementation, I found this activity to be both unnecessary and disturbing.

Until properly notified, both PRA and the Continuing Education Unit had a right to maintain a status quo position, so that if necessary, an orderly removal of PRA's property (innocuous posters and signs) could have been done in a mutually agreeable manner.

Board of Regents  
Northern Marianas College  
NMC President Joaquin Sablan

*Derna Castro*

From: Mr. Leonard (Butch) Wolf

Re: Emergency Meeting

Due to a lack of communication, I feel that it is urgent for both parties to have a meeting to discuss a future understanding between us. In this emergency meeting I would like to request the following people be present:

Acting BOR Chairman Fermin Atalig  
BOR Program Chairperson Abeline C. Cabrera  
Other members of the Board of Regents  
NMC President Joaquin Sablan  
Former NMC President Agnes McPhetres  
Dean of Continuing Education Ed Camacho  
Dr. Jack Angello

The importance of this meeting would be to discuss our lease agreement and the NMC/PRA instructional program, in order to see if this matter can be resolved in a business type manner, which will avoid any possible legal situation that may occur from NMC's inability to support the initiation of our program.

This meeting is of the utmost importance for both parties, so that we can resolve these difficulties in an expeditious and fair manner. Please respond in writing within ten (10) days from receipt of this correspondence to the above PRA address.

*Butch Wolf*

HAND DELIVERED 3/9/01

Ms. Meliza Guajardo  
Scholarship Coordinator  
CNMI Scholarship Office  
Caller Box 10007  
Saipan, MP 9695

Dear Ms. Guajardo:

During our telephone conversation yesterday it was mentioned that there was concern from your office that the NMC/PRA Film & TV A/V classes were not being placed into the NMC official class schedules, which would indicate something was wrong with why they weren't included in the NMC Fall '00 and Spring '01 schedules.

As we discussed, their exclusion from the NMC official class schedules would prevent interested Vocational Educational Film & TV students from enrolling full-time into the Film & TV classes, thereby interfering with their registration process at NMC and their EAP processing at your office.

Sincerely,

Dr. Jack Angello  
Director of Vocational Trades & Special Projects
